

Handmade Soap Kerala

Keyword Research & On-Page SEO Strategy for a Handmade Soap Business in Kerala

BUSINESS

Handmade Soap Kerala

INDUSTRY

Natural Skincare

FOCUS

Keyword & On-Page SEO

01 Project Overview

This project focused on improving the organic visibility of a handmade soap business serving customers across Kerala. The objective was to identify relevant search terms, map them to the right website pages, and build a content and on-page SEO plan that could increase visibility, traffic, and product interest.

02 Business Background

The client is a handmade soap business based in Kerala. The business offers natural, herbal, and Ayurvedic soap products targeted at customers who prefer chemical-free skincare options. Since the brand serves the full Kerala market, the SEO strategy was designed to target state-level search demand rather than only one city.

03 SEO Goals

The main goals for the project were:

Increase organic visibility for soap-related searches in Kerala	Attract users looking for natural, herbal, and Ayurvedic soap products
Improve page relevance through keyword mapping	Build a blog and on-page content structure that supports product discovery
Create a scalable SEO structure for both WordPress and HTML-based websites	

04 Audit Methodology

The SEO process followed these steps:

1	Define Goals & Location	Defined the business goal and target location across Kerala.
2	Keyword Research	Performed keyword research using Google Keyword Planner.
3	Review Data	Reviewed search volume, competition, and intent for each keyword.
4	Keyword Selection	Selected the most relevant keywords for the business.
5	Page Mapping	Mapped keywords to website pages for targeted optimisation.
6	Content Planning	Planned blog content around informational and commercial intent.
7	On-Page SEO Outline	Outlined on-page SEO elements for both WordPress and HTML implementation.

05 Tools Used

For this project, the main tool used was:

Google Keyword Planner

Optional supporting tools:

Google Search

Google Trends

Manual SERP Review

06 Key Findings

The keyword research showed that users in Kerala are actively searching for soap-related terms. The strongest opportunities include both product keywords and informational/benefit-based keywords around natural soap, herbal soap, Ayurvedic soap, and handmade skincare — better suited for blog content, product pages, and category pages.

Keyword	Avg. Monthly Searches	Competition	Notes
organic soap kerala	50	High	Strong commercial relevance
ayurvedic soap kerala	50	High	Good product-market fit
ayurvedic soap in kerala	50	High	Strong local product intent
best ayurvedic soap in kerala	50	High	Good for blog or product page
chandrika soap price in kerala	50	Medium	Brand-specific, lower priority
origin soap kerala	50	Medium	Brand-specific, lower priority
natural soap kerala	No visible vol.	Unknown	Strong topical relevance
herbal soap kerala	No visible vol.	Unknown	Strong topical relevance
handmade skincare kerala	No visible vol.	Unknown	Good supporting topic

07 Keyword Strategy

Primary Keyword

natural soap kerala

Secondary Keywords

herbal soap kerala

organic soap kerala

ayurvedic soap kerala

best ayurvedic soap in kerala

handmade skincare kerala

Search Intent

Transactional — users ready to buy

Informational — users researching skin-friendly soap options

08 Website Mapping

Here is how the keywords are assigned to pages:

Page Type	Target Keyword	Purpose
Homepage	handmade soap Kerala / natural soap Kerala	Brand introduction and broad visibility
Category Page	organic soap Kerala	Product grouping and commercial intent
Product Page	ayurvedic soap Kerala	Direct product targeting
Product Page	herbal soap Kerala	Direct product targeting
Blog Post	best ayurvedic soap in Kerala	Educational content and organic traffic
Blog Post	handmade skincare Kerala	Supporting content and topical authority

Page logic:

Homepage should target the main brand and broad service/product keywords. Product pages should target purchase-focused keywords. Blog posts should target educational keywords and bring users into the funnel.

09 Content Planning for Blog

A blog can support both traffic and trust. Recommended blog ideas:

Benefits of Natural Soap for Healthy Skin in Kerala	Why Ayurvedic Soap Is a Better Choice for Daily Use
How Handmade Soap Supports Better Skincare	Best Soap Ingredients for Sensitive Skin
Natural Soap vs Chemical Soap: What to Choose	

Best blog focus — each post should combine:

A user problem	A product benefit
A soft brand mention	A call to action

10 On-Page SEO Implementation

The same SEO principles apply to both WordPress and HTML websites. Key elements to implement on every page:

Title Tag: Use the primary keyword early. Example: Natural Soap Kerala | Handmade Soap for Healthy Skin

Meta Description: Write a clear summary with keyword and benefit. Example: Discover natural handmade soap in Kerala made with skin-friendly ingredients.

H1: Use one main page heading only. Example: Natural Handmade Soap in Kerala

H2 Sections: Why Choose Natural Soap? / Benefits of Handmade Soap / Herbal and Ayurvedic Ingredients / How Our Soap Supports Healthy Skin

Internal Links: Link blog posts to homepage, product pages, category page, and contact page.

Image SEO: Use descriptive file names and alt text. Example: handmade-natural-soap-kerala, herbal-soap-bar-ayurvedic-ingredients

URL Structure: Keep URLs short and keyword-focused. Examples: /natural-soap-kerala, /herbal-soap-kerala, /best-ayurvedic-soap-kerala

11 WordPress and HTML Version

The same content can be used for both platforms. Only the technical method of adding content differs.

WordPress — update:

SEO title
Meta description
Permalink
Heading blocks
Image alt text
Internal links
Blog post content

HTML — update:

<title>
<meta name="description">
One <h1>
Supporting <h2> and <h3>
Anchor links
Image alt attributes
URL slug structure

12 SEO Recommendations

The recommendations for this project are:

Focus on Kerala-wide keyword targeting	Build one strong homepage around the main brand/product theme
Create product pages for specific soap types	Publish blog posts to support informational search intent
Use keyword-rich titles, descriptions, and headings	Improve internal linking between blog and product pages
Add image alt text and clean URLs	Keep content natural and user-focused, not keyword-stuffed

13 Priority Action Plan

Phase	Actions
Immediate Actions	Finalise primary keyword · Prepare homepage SEO elements · Create one product page for each soap type · Publish first blog post
Short-term Actions	Build 3–5 blog articles · Add internal links · Improve image optimisation · Review page headings and metadata
Long-term Actions	Expand content to skin-related and ingredient topics · Add local and state-level targeting variations · Track keyword performance and refine content

14 Expected Results

After implementation, the expected improvements are:

Better visibility for soap-related searches in Kerala	More traffic from users interested in natural and Ayurvedic products
Higher relevance for product pages	Improved blog traffic from informational searches
Stronger brand authority in the handmade soap niche	

15 Conclusion

This project shows how keyword research, intent analysis, website mapping, content planning, and on-page SEO work together to support organic growth. By targeting Kerala-based soap keywords and aligning them with the right pages, the handmade soap business can improve search visibility and attract more relevant customers. The same SEO strategy can be implemented on both WordPress and HTML-based websites with only technical differences in how the content is added.

A. Keyword Planner Data

Data extracted from Google Keyword Planner — April 2025 to March 2026. All keywords researched in INR currency targeting Kerala, India.

Users > athiramol > Downloads > Keyword Stats 2026-04-11 at 15_23_52.csv > data
