1. Executive Summary

This Off-Page SEO Audit evaluates the external search signals influencing the online authority and visibility of WebCastle Technologies, India. The analysis focuses on backlink quality, referring domains, brand mentions and competitor link strategies that can strengthen the website's organic search presence.

Off-page SEO factors play a crucial role in determining a website's credibility and trustworthiness in search engines. A strong backlink ecosystem and consistent brand presence across the web contribute significantly to improved search rankings and domain authority.

This audit provides a structured analysis of the current off-page landscape and identifies strategic opportunities to enhance the website's authority, mitigate potential risks, and strengthen its competitive position within the digital services market.

The findings presented in this report will support the development of a sustainable link-building strategy aimed at improving organic visibility, increasing domain authority, and strengthening the brand's digital footprint.

2. Audit Goals

The primary objective of this off-page SEO audit is to assess the external factors that influence the search performance and authority of WebCastle Technologies.

Key goals of this audit include:

- Evaluate the overall strength and structure of the website's backlink profile
- Identify high-quality referring domains and potential toxic backlinks
- Assess anchor text distribution and link attributes (follow vs nofollow)
- Analyze backlink acquisition trends and link growth patterns
- Benchmark backlink performance against key industry competitors such as Web Design Cochin
- Identify opportunities for acquiring high-authority backlinks
- Evaluate the brand's online presence through digital mentions and external platforms

The insights derived from this audit will help guide future off-page SEO strategies designed to strengthen domain authority and improve search engine trust signals.

3. Domain Overview

Field	Details
Website	https://webcastletech.com
Brand	WebCastle Technologies
Industry	IT Services, Web Development, and Digital Marketing
Target Market	India (Primary Market)
Founded	2008
Headquarters	Kochi, India

WebCastle Technologies is a digital solutions provider specializing in web development, mobile application development, e-commerce solutions, and digital marketing services. The company focuses on helping businesses establish and enhance their digital presence through customized technology solutions.

Founded in 2008 and headquartered in Kochi, India, the company provides end-to-end digital services including website design, ERP development, SEO, social media marketing, and application development. With a team of experienced developers, designers, and marketing professionals, the company aims to deliver scalable digital solutions that support business growth and online visibility.

4. Competitor Domain Overview

Field	Details
Competitor Website	https://www.webdesigncochin.in
Brand	Web Design Cochin
Industry	Website Design and Digital Marketing
Competitive Context	Operates within same digital services ecosystem in Kerala/Kochi market

Web Design Cochin operates within the same digital services ecosystem, providing web design and related development services. Competing websites within this sector often rely heavily on strong backlink profiles, directory citations, and digital PR coverage to improve their search visibility.

Analyzing competitor backlink strategies helps identify authoritative domains linking to competitors and uncover potential link-building opportunities that could strengthen the backlink profile of WebCastle Technologies.

5. Tools Used for the Audit

The off-page SEO audit was conducted using a combination of professional SEO platforms and manual research methods to evaluate backlink performance, brand visibility, and external trust signals.

Primary SEO Analysis Tool

- SEMrush — Used as the primary platform for backlink analysis, authority score evaluation, referring domain analysis, anchor text distribution, follow vs nofollow link attributes, backlink growth trends, competitor backlink comparison, and identification of potential toxic links.

Search & Brand Monitoring

- Google Search — Used for identifying brand mentions, forum discussions, blog references, and potential backlink opportunities through manual search queries.

Social Media Presence & Engagement

- LinkedIn, Facebook, X (Twitter), Instagram, YouTube — Reviewed to assess social signals, brand visibility, and engagement related to the company's online presence.

Local Listings & Review Platforms

- Google Maps — Used to evaluate local business listings, customer reviews, and citation consistency across local search results.
- Trustpilot — Reviewed to assess customer feedback and online reputation signals.

Community & Forum Research

- Quora — Reviewed to identify industry discussions, brand mentions, and potential opportunities for community engagement and content visibility.

Manual Research Methods

Manual web research was also conducted to identify industry partnership opportunities, guest posting platforms, directory listings, forum discussions, and unlinked brand mentions.

Our Domain Authority & Backlink Profile

Evaluates the overall strength of the website's backlink ecosystem, including domain authority, referring domains, link quality, and backlink growth trends.

6.1 Domain Authority

Authority Score Overview

29	568	765K	8.6K	5.8K
Authority Score	Referring Domains	Backlinks	Monthly Visits	Organic Traffic

Metric	Value	Status
Authority Score	29 / 100	Good
Network Graph Rating	Reputable	Positive
Overall Toxicity Score	Low	Good
Outbound Domains	79	Normal
Backlink Trend (3 months)	-3%	Declining
Referring Domain Trend (1 year)	558 → 670 → 558	Peak & Decline

Key Findings

- Authority Score of 29 is rated 'Good' and has remained stable over the last 12 months, hovering between 25–29.
- Network graph classifies the domain as 'Reputable', indicating a trustworthy link neighbourhood.
- Despite 765K backlinks from 568 referring domains, monthly visits are only 8.6K — a disconnect indicating many links carry low SEO value.
- Backlinks are trending down (-3%) and referring domains have declined from a peak of 670 (Oct 2025) to ~558 (Apr 2026).
- The authority score trend is flat — indicating link-building activity is not translating into meaningful authority growth.

Recommendations

- Focus on acquiring links from higher-authority domains (AS 50+) rather than accumulating volume, to push the score above 35.
- Address the disconnect between backlink count and organic traffic — many links appear to be low-quality or from irrelevant niches.
- Target topically relevant sites (web development, digital marketing, IT services) for link building.
- Resume active link-building immediately — the declining referring domain trend is the most urgent issue.

6.2 Backlink Profile Summary

Backlink Types

Backlink Types		
Text	97% — 251K	
Image	2% — 5.3K	
Form	0%	
Frame	<1% — 2	

Link Attributes

Link Attributes		
Follow	99% — 758K	
Nofollow	<1% — 7K	
Sponsored	0%	
UGC	<1% — 32	

Key Findings

- 97% of backlinks are text-based (251K), which is healthy and natural.
- Follow link ratio is 99% — almost entirely Follow links are abnormal. A natural profile typically has 85–90% Follow.
- Nofollow links are less than 1% (7K) — extremely low, indicating no organic social, forum, or directory Nofollow links.
- Zero Sponsored links and negligible UGC links further confirm an artificially narrow link attribute profile.

Recommendations

- An almost entirely Follow profile can appear manipulative to Google. Build Nofollow links through directories, forums, press mentions, and social media profiles.
- Target platforms like Reddit, Quora, LinkedIn, and industry directories to create a more organic-looking attribute profile.
- Aim for an 85–90% Follow / 10–15% Nofollow balance to match industry norms.

Follow Links — Top Referring Domains

AS	Domain	Category	Backlinks	First Seen	Last Seen
2	webcastle.in	Online Services	518,835	Aug 14, 2024	Recent
11	casadel.com	Real Estate	242,673	Feb 18, 2024	Recent
5	seooptimizationdirectory.com	Directory	1,869	Aug 19, 2025	Recent
5	previewbay.com	Online Services	711	Dec 15, 2024	Recent
23	bestcss.in	Online Services	484	Jul 29, 2025	Recent
6	ask-directory.com	Directory	459	Jan 12, 2025	Recent
5	backpagedir.com	Online Services	423	Jan 9, 2025	Apr 2026
33	vaidyaratnammooss.com	Wellness	347	Sep 6, 2024	Apr 2026
15	eqlic.com	Online Services	220	Sep 29, 2024	Recent
25	jayde.com	Online Services	214	Mar 13, 2022	Recent

Critical Finding — Link Concentration Risk

- webcastle.in alone contributes 518,835 backlinks — 68% of all follow backlinks from a single AS-2 domain.
- casadel.com (Real Estate, AS-11) contributes another 242,673 links — completely irrelevant industry.
- These two domains alone inflate the raw backlink count to 765K, masking the true weakness of the profile.
- This extreme concentration is a significant red flag. If either domain removes links, the profile collapses.
- Both appear to be sitewide or template-based links, which carry very little real SEO equity.
- Recommendation: Diversify link acquisition. No single domain should contribute more than 5–10% of total links.

NoFollow Links — Top Referring Domains

AS	Domain	Category	Backlinks
2	ualrightapp.com	Advertising & Marketing	4,178
18	topitcompanies.co	Information Technology	513
38	techreviewer.co	Information Technology	299
2	redfabcblogspot.com	Blog	195
2	ballerzasblogspot.com	Blog	94
2	bckstasblogspot.com	Blog	90
30	selfgrowth.com	Wellness	89
12	simplifiedseotools.com	Advertising & Marketing	80
42	sitelike.org	Online Services	58

Nofollow Profile Observations

- The Nofollow profile is mixed — techreviewer.co (AS-38) and topitcompanies.co (AS-18) are legitimate review platforms worth nurturing.
- Multiple low-authority blogspot.com subdomains (redfabcblogspot.com, ballerzasblogspot.com, bckstasblogspot.com) with AS-2 appear to be spam blogs.
- These blogspot spam links should be reviewed for potential disavow action.
- selfgrowth.com (Wellness, AS-30) is an irrelevant niche — the link has little topical value.

6.3 Referring Domain Analysis

Categories of Referring Domains

Categories of Referring Domains		
Online Services	15% — 85 domains	
Information Technology	11% — 60 domains	
Advertising & Marketing	6% — 33 domains	
Computer Software & Dev	2% — 10 domains	
Education	2% — 9 domains	

Referring Domains by Authority Score

Referring Domains by Authority Score		
0 – 10 (Very Low)	68% — 387 domains	
11 – 20 (Low)	10% — 56 domains	
21 – 30 (Low-Medium)	11% —	

31 – 40 (Medium)	6% — 36 domains	
41 – 50 (Medium)	3% — 15 domains	
51 – 60 (Good)	<1% — 4 domains	
61 – 70 (Strong)	<1% — 3 domains	
71 – 80 (Strong)	<1% — 1 domain	
81 – 90 (Very Strong)	0% — 0 domains	
91 – 100 (Elite)	1% — 6 domains	

TLD Distribution

TLD	% of Referring Domains	Count	Assessment
.com	69%	394	Healthy — international coverage
.in	7%	42	Below target for India-focused site
.org	3%	16	Good for trust signals
.edu	<1%	1	Very low — high-value opportunity
.gov	0%	0	Missing — niche opportunity
Other	21%	118	Needs audit — may include spam TLDs

Top Countries

Country	% Share	Referring Domains	Relevance to Target Market
United States of America	40%	200	High — global authority
Singapore	15%	75	Medium — regional relevance
India	11%	54	High — primary target market (should be higher)
United Kingdom	4%	19	Medium — international authority
Moldova	3%	13	Low — potential spam risk
France	2%	11	Low — limited relevance

Key Findings

- 68% of referring domains score 0–10 in authority — the vast majority of the link profile is low quality.
- Only 6 domains (1%) score 91–100 — elite-level authority links are almost non-existent.
- .in TLD coverage is only 7% (42 domains) — surprisingly low for a company targeting the Indian market.
- Moldova (3%, 13 domains) is unusual and may indicate low-quality or spam link sources.
- Topical relevance is reasonable — Online Services (15%) and IT (11%) are broadly relevant categories.
- Missing .gov links and only 1 .edu link represent significant untapped authority opportunities.

Recommendations

- Prioritize outreach to domains with AS 40+ to improve the authority distribution of the profile.
- Pursue .edu and .org links through resource page link building, digital PR, and educational institution partnerships.
- Increase .in backlinks from Kerala/India-based business directories, news sites, and chambers of commerce.
- Audit the 21% 'Other' TLD group and the Moldova-origin links for toxic or irrelevant sources.

6.4 Backlink Quality Assessment

Overall Toxicity Score

LOW Overall Toxicity	3 Toxic Backlinks	45 Pot. Toxic	492 Non-Toxic	540 Referring Domains	8,596 Analyzed Backlinks
--------------------------------	-----------------------------	-------------------------	-------------------------	---------------------------------	------------------------------------

Source URL	Toxicity Score	Risk Level
papasearch.net/Virtual_Reality/VirtualReality69.html	73	High Toxic
adzbusiness.com/website-list-461/	62	Toxic
webcastelmedia.blogspot.com/2020/04/brand-propulsion	62	Toxic
msidevs.net/top/Top1M840000.html	59	Toxic
www.msidevs.net/top/Top1M840000.html	59	Toxic
42ndcadian.blogspot.com/2011/02/lonely-howl.html	57	Toxic
xyloyl.com/website-list-461/	57	Toxic

Backlinks to Review

Category	Count	Action Required
Toxic	58	Disavow immediately via Google Search Console
Potentially Toxic	1,423	Review and disavow confirmed low-quality links
Non-Toxic	7,115	Monitor; no immediate action needed

Key Findings

- Overall toxicity is rated LOW — this is a positive signal. 91.1% of analyzed backlinks are non-toxic.
- 58 confirmed toxic backlinks require immediate disavowal action.
- 1,423 potentially toxic backlinks need review — particularly those from irrelevant blogspot pages and website list directories.
- Top toxic sources are low-quality website listing directories (adzbusiness, xyloyl, msidevs)
- No new, broken, or lost domains reported in the backlink audit — profile appears stable in the short term.

Recommendations

- Create and submit a Google Disavow file targeting the 58 confirmed toxic backlinks — particularly papasearch.net (score: 73).
- Review the 1,423 potentially toxic backlinks: prioritise disavowing those from website-list-461 pattern directories, unrelated blogspot pages, and bulk directory submissions.
- Re-audit monthly as new backlinks are being acquired to catch new toxic links early.
- Avoid replicating the link patterns that created toxic links (bulk directory submissions, off-topic blog mentions).

6.5 Anchor Text Distribution

Backlinks by Anchor Type

Backlinks by Anchor Type		
Money (exact-match keyword)	50.6% — 4,352	
Other (generic)	14.9% — 1,284	
Naked URL	9.7% — 830	
Empty Anchor	8.9% — 764	
Compound (partial match)	6.1% — 523	
Organic (natural)	5.2% — 449	
Branded	4.6% — 394	

CRITICAL RISK — Money Anchor Over-Optimisation

- 50.6% money anchor concentration is the single largest risk in this backlink profile.
- Google's Penguin algorithm specifically targets exact-match anchor over-optimisation at this scale.
- Industry benchmark: money anchors should be no more than 5–10% of total anchor profile.
- The current 50.6% rate is 5–10x higher than recommended — this alone could trigger a ranking penalty.
- Branded anchor text is only 4.6% — far too low. For a company this established, branded anchors should be 40–50%.

Top Anchor Texts

Anchor Text	Backlinks	Domains	First Seen	Risk Assessment
Empty Anchor	522,175	42	May 22, 2023	Sitewide/template links — low value
webcastle	244,601	51	Feb 18, 2024	Branded — good
ualright	4,183	1	Jan 13, 2025	Suspicious — 1 domain only
seo company in kochi seo services	1,869	1	Aug 19, 2025	High risk — exact match, 1 domain
webcastletech.com	716	162	Oct 20, 2023	Naked URL — healthy
webcastletech	629	71	Sep 23, 2024	Branded — good
go to website	513	1	Jan 24, 2025	Generic — OK
web designing compnay in india web development	459	1	Jan 13, 2025	High risk — exact match, 1 domain
seo company in dubai digital marketing...	423	1	Jan 9, 2025	High risk — exact match, 1 domain
webcastle.in	298	48	Dec 12, 2018	Branded variation — OK

Key Findings

- Empty Anchor (522,175 links from only 42 domains) confirms massive sitewide template links from webcastle.in and casadel.com.
- Single-source exact-match anchors like 'seo company in kochi | seo services' (1,869 from 1 domain) are classic paid/placed link signatures.
- 'ualright' (4,183 links from 1 domain — ualrightapp.com) is a major red flag — 100% concentration in one unrelated domain.
- Branded anchor ratio is too low relative to total backlink volume.
- Several piped anchor texts (using | separator) confirm bulk directory submissions from single sources.

Recommendations

- Urgently rebalance anchor profile: target ~40–50% branded, ~20–25% naked URL, ~10–15% generic, ~10–15% partial match, <5% exact-match money.
- Stop acquiring more exact-match anchor links from single domains.
- Build branded anchor links through press mentions, industry roundups, and client testimonials.
- Consider disavowing ualrightapp.com links if their anchor text distribution contributes to over-optimisation.

6.6 Top Linking Domains

Link Profile Distribution

Metric	Count	Assessment
Referring Domains	568	Moderate — needs growth
Referring IPs	496	Good diversity (87% unique IPs)
Referring Subnets	392	Good — links not from same server network

Similar Competitive Profiles

Competitor Domain	Competition Level	Action
spiderworks.in	10%	Analyse their backlinks for gap opportunities
iroidtechnologies.com	9%	Identify shared directories and outreach targets
globosoft.in	9%	Target the same industry platforms they use
previewbay.com	8%	Cross-reference link sources
cedarsofttech.com	7%	Monitor for new link opportunities

Recommendations

- Use SEMrush's Backlink Gap tool with spiderworks.in, iroidtechnologies.com, and globosoft.in to find domains that link to all three but not webcastletech.com.
- Target the same industry directories and review platforms that these competitors appear on.
- Focus on dominating the Kerala/Kochi local IT market by securing listings on all major local business directories that competitors use.

6.7 Top Linked Pages

Target URL	Referring Domains	Issue
https://webcastletech.com/	477	Good — primary link target
http://webcastletech.com/	46	Duplicate — should 301 redirect to HTTPS
http://www.webcastletech.com/	18	Duplicate — should 301 redirect to HTTPS
https://webcastletech.com/services/seo-company...	17	Good — service page needs more links
https://webcastletech.com/services/seo-company...	12	Good — needs more links

Key Findings

- Homepage dominates with 477 referring domains — 88% of all page-level links go to the homepage.
- Two non-canonical versions ([http://](http://webcastletech.com/) and [http://www.](http://www.webcastletech.com/)) are receiving link equity that should flow to the canonical HTTPS URL.
- SEO service pages have only 12–17 referring domains — far too few to rank competitively for commercial keywords.
- No deep links to blog, case study, or portfolio pages are visible in the top-linked pages.
- Comparison: Competitor webdesigncochin.in has 83 domains linking to its SEO page vs webcastletech.com's 17.

Recommendations

- Implement 301 redirects from <http://webcastletech.com/> and <http://www.webcastletech.com/> to the canonical <https://webcastletech.com/> — this consolidates all link equity.
- Launch a dedicated link-building campaign targeting the SEO, web design, and digital marketing service pages.
- Build deep links to case study pages, blog articles, and resource pages to distribute authority throughout the site.
- Target 50+ referring domains for each key service page within 6 months.

6.8 Link Growth Trend

Overall Backlink Profile Trend (90 Days)

Period	Analyzed Backlinks	Referring Domains	Trend
Jan 29, 2026	~7,000	~558	Baseline
Feb – Mar 2026	~8,500	~558	Stable — flat
Apr 14–24, 2026	~14,000	~558	Sharp recent uptick

Backlinks Trend (1 Year)

Period	Backlinks	Key Event
May 2025	~307K	Low baseline — before campaign
Aug 2025	~418K	Growth beginning
Oct 2025	~639K	Rapid spike — bulk link campaign
Jan 2026	~750K	Peak — campaign plateau
Apr 2026	~750K	Stable at peak

Referring Domains Trend (1 Year)

Period	Referring Domains	Trend
May 2025	~558	Baseline
Aug 2025	~642	Growth — gaining new domains
Oct 2025	~670	Peak — most diverse point
Jan 2026	~586	Decline — losing domains
Apr 2026	~558	Further decline — approaching baseline

New vs Lost Backlinks Overview (Last 6 Months)

Period	New Backlinks	Lost Backlinks	Net Change
Oct 20 – Nov 17, 2025	~48,000	~0	Strong positive — bulk campaign
Nov 17 – Dec 15, 2025	~32,000	~0	Positive — campaign continuing
Dec 15 – Jan 12, 2026	~16,000	~0	Slowing — campaign winding down
Jan 12 – Feb 9, 2026	~0	~0	Neutral — campaign stopped
Feb 9 – Apr 6, 2026	~0	~0	Flat — no new acquisition

Key Findings

- The backlink spike from 307K to 750K (May–Jan 2026) was driven by a single bulk link-building campaign, not organic growth.
- Referring domains peaked at 670 (Oct 2025) then declined to 558 (Apr 2026) — the loss of 112 referring domains is a serious concern.
- No new backlink acquisition has occurred since January 2026 — the campaign appears to have completely stopped.
- The sudden spike pattern (rather than steady growth) may attract algorithmic scrutiny from Google.
- Recent 90-day data shows a new uptick in analyzed backlinks — this needs monitoring for quality.

Recommendations

- Adopt a consistent, sustainable link-building strategy: target 10–15 new quality referring domains per month minimum.
- Do NOT run another bulk campaign — the spike-and-stagnate pattern is a known Penguin algorithm risk.
- Set up SEMrush alerts for lost referring domains to identify and reclaim links quickly.
- Investigate why 112 referring domains were lost from the Oct 2025 peak and attempt to reclaim them through outreach.
- Implement a monthly link audit cadence to track quality vs quantity of new acquisitions.

Competitor Domain Authority & Backlink Profile

Analyses and compares competitor domain authority and backlink profiles to benchmark against your own link-building performance.

Competitor: webdesigncochin.in

7.1 Domain Authority

25 Authority Score	1K (+26%) Referring Domains	29.1K (+13%) Backlinks	1.1K Monthly Visits	1.8K Organic Traffic
------------------------------	---------------------------------------	----------------------------------	-------------------------------	--------------------------------

Head-to-Head Comparison

Metric	webcastletech.com	webdesigncochin.in	Advantage
Authority Score	29 (Good)	25 (Good)	webcastletech.com
Referring Domains	568 (↓ Declining)	1,000 (+26% ↑)	Competitor GROWING FASTER
Backlinks	765K	29.1K	webcastletech.com (but low quality)
Monthly Visits	8.6K	1.1K	webcastletech.com
Organic Traffic	5.8K	1.8K	webcastletech.com
Network Rating	Reputable	Healthy	Competitor
Toxicity Score	Low	High (7.4%)	webcastletech.com
Follow/Nofollow Ratio	99% / 1%	87% / 13%	Competitor (healthier)
Money Anchor %	50.6%	22.9%	Competitor (safer)
Referring Domain Growth	Declining ↓	Rapidly Growing ↑ ↑	CRITICAL — Act Now

7.2 Backlink Profile Summary

Metric	webdesigncochin.in	vs webcastletech.com
Text Backlinks	94.9% — 11,432	webcastletech: 97% — similar
Image Backlinks	3% — 366	webcastletech: 2% — similar
Frame Backlinks	2.1% — 254	webcastletech: <1% — competitor higher
Follow Backlinks	87.2% — 10,513	webcastletech: 99% — competitor healthier
Nofollow Backlinks	12.8% — 1,539	webcastletech: <1% — competitor far better
UGC Links	0.4% — 50	webcastletech: <1% — similar

Competitor Follow Links — Top Referring Domains

AS	Domain	Category	Backlinks	First Seen
13	lemon-directory.com	Construction & Maintenance	7,854	Mar 7, 2024
6	trafficdirectory.org	Directory	2,222	Feb 7, 2026
6	target-directory.com	Reference	1,990	Mar 29, 2026 (New)
5	apeopledirectory.com	Directory	1,842	Feb 26, 2024
14	bestdirectory4you.com	Directory	1,335	Dec 22, 2024
20	protospielsouth.com	Gaming	943	Dec 1, 2025
17	coles-directory.com	Software & Dev	796	Aug 29, 2024
22	tcteamcorp.com	—	620	Dec 12, 2023

Competitor Follow Link Observations

- The competitor's link base is almost entirely low-quality directories (AS 5–22) — similar strategy to webcastletech.com.
- target-directory.com (Mar 29, 2026) shows ACTIVE ongoing link-building — the competitor has NOT stopped their campaign.
- Multiple directory sources (lemon-directory, trafficdirectory, apeopledirectory) are beatable with quality editorial links.
- This directory-heavy approach is a weakness — webcastletech.com can gain a qualitative advantage with editorial and PR links.

Competitor NoFollow Links — Top Referring Domains

AS	Domain	Backlinks	Note
18	perchcms.com	276	Legitimate IT platform
2	caneoi.blogspot.com	136	Low-quality blog
2	acknowledgeasd.blogspot.com	56	Spam blog — IP: 172.253.122.132
2	4xxxxasd.blogspot.com	55	Spam blog — same IP cluster
2	37181asd.blogspot.com	52	Spam blog — same IP cluster
2	37182asd.blogspot.com	51	Spam blog — same IP cluster
2	aenthasd.blogspot.com	50	Spam blog — same IP cluster

Competitor Nofollow Risk

- Multiple auto-generated spam blogspot subdomains sharing the same IP blocks (172.253.122.132, 142.251.163.132) are clearly part of a low-quality link network.
- This is a known pattern of bulk blogspot spam — Google is likely already discounting these.
- webcastletech.com has similar blogspot spam in its Nofollow profile — both sites should disavow these patterns.
- perchcms.com (AS-18) is a legitimate CMS platform — a positive Nofollow signal.

7.3 Referring Domain Analysis

Categories of Referring Domains

Competitor: Categories of Referring Domains		
Online Services	16% — 160 domains	
Information Technology	7% — 66 domains	
Mass Media	2% — 18 domains	
Advertising & Marketing	2% — 20 domains	
Computer Software & Dev	2% — 17 domains	

Referring Domains by Authority Score — Competitor

Competitor: Authority Score Distribution		
0 – 20 (Low)	76.9% — 714 domains	
21 – 40 (Medium)	18.5% — 172 domains	
41 – 60 (Good)	3.6% — 33 domains	
61 – 80 (Strong)	0.9% — 8	

	domains	
81 – 100 (Elite)	0.1% — 1 domain	

TLD Distribution-Competitor

TLD	Competitor %	Competitor Domains	webcastletech.com % (for comparison)
.com	61%	611	69%
.in	21%	214	7% (webcastletech needs more .in links)
.org	2%	25	3%
.edu	<1%	1	<1%
.gov	0%	0	0%
Other	15%	154	21%

Top Countries-Competitor

Country	Competitor %	Domains
United States of America	47%	368
India	28%	220
France	5%	39
United Kingdom	4%	30
Germany	3%	27
Singapore	2%	18

Comparison Insight — Local Dominance

- The competitor has 214 .in domains (21%) vs webcastletech.com's only 42 (7%) — 5x more local Indian TLD coverage.
- The competitor has 220 India-based referring domains (28%) vs webcastletech.com's 54 (11%).
- This gives the competitor a significant advantage in local Kerala/India search rankings.
- The competitor also has Mass Media links (18 domains) — webcastletech.com has none visible in its top categories.
- webcastletech.com must urgently build India-based and .in TLD links to compete locally.

7.4 Backlink Quality Assessment

HIGH Toxicity Rating	69 (7.4%) Toxic Links	229 (24.7%) Pot. Toxic	630 (67.9%) Non-Toxic	78 Broken Domains	741 Lost Backlinks
--------------------------------	---------------------------------	--	---	--------------------------------	------------------------------

Most Toxic Source URLs	Toxicity Score
reportworld.in/web-design-cochin-a-leading-website-designing-...	76
newswires.in/web-design-cochin-a-leading-website-designing-...	76
kiuly.com/freelance-seo-writers-one-surefire-way-to-land-gigs-...	76
nagalandnews24x7.in/web-design-cochin-a-leading-website-...	76
gujaratwatch.co.in/web-design-cochin-a-leading-website-...	76
adamrogers135.wordpress.com/tag/web-designing-kochi/	76
reachnews.in/web-design-cochin-a-leading-website-designing-...	76

Competitor Backlinks to Review	Count
Toxic Backlinks	165
Potentially Toxic Backlinks	940
Non-Toxic Backlinks	10,947

Competitive Advantage — Exploit Competitor's High Toxicity

- The competitor's HIGH toxicity rating (7.4% toxic vs our 0.6%) is webcastletech.com's single clearest competitive advantage.
- 165 confirmed toxic links and 940 potentially toxic links represent a serious penalty risk for the competitor.
- The toxic pattern (mass-syndicated press releases to low-quality Indian news aggregators) may trigger a Google algorithmic action.
- 78 broken referring domains and 741 lost backlinks indicate an unstable link profile.
- If the competitor receives a Google penalty, webcastletech.com must be positioned to capture those rankings immediately.
- Do NOT replicate the competitor's press release spam tactic — it is the source of their toxicity.

7.5 Anchor Text Distribution

Competitor: Backlinks by Anchor Type		
Other (generic)	25.1% — 3,026	
Money (exact-match)	22.9% — 2,764	
Compound (partial)	18.8% — 2,268	
Naked URL	18.4% — 2,223	
Branded	6.8% — 816	
Organic (natural)	5.2% — 630	
Empty Anchor	2.7% — 325	

Anchor Text	Backlinks	Domains	Risk Assessment
branding-company-cochin	7,862	2	High — sitewide links, exact match
branding company cochin	3,177	2	High — exact match from 2 domains
best seo expert in kochi	2,225	4	Medium — exact match money anchor
smart web development company in kerala	1,989	1	High — exact match, 1 domain
https://www.webdesigncochin.in	1,561	302	Healthy — branded naked URL
https://www.webdesigncochin.in/	985	156	Healthy — variant naked URL
logo designers in kerala	955	4	Medium — partial match
webdesigncochin.in	890	126	Healthy — branded
Empty Anchor	636	31	Normal

Anchor Profile Comparison

- Competitor money anchor (22.9%) is less than half of webcastletch.com's (50.6%) — significantly safer.
- Competitor has much better naked URL anchor coverage (18.4% vs webcastletch.com's 9.7%).
- Competitor's 'branding-company-cochin' (7,862 from 2 domains) shows the same sitewide template problem as webcastletch.com.
- Overall, the competitor's anchor distribution is healthier and less penalisation-prone than webcastletch.com's.
- webcastletch.com must urgently address its 50.6% money anchor to reach the competitor's safer 22.9% level.

7.6 Top Linking Domains

Metric	Competitor Value	Assessment
Referring Domains	1,000 (+26% growth)	Fast growing — urgent concern
Referring IPs	788	78.8% unique — good diversity
Referring Subnets	580	Good spread — not server-concentrated

7.7 Top Linked Pages

Target URL	Domains	Backlinks	vs webcastletech.com
https://www.webdesigncochin.in/	611 (65.8%)	4,865	webcastletech: 477 domains — competitor ahead
https://www.webdesigncochin.in/seo-ernakulam-kerala/	83 (8.9%)	908	webcastletech: 17 domains — competitor 5x stronger
https://webdesigncochin.in/	66 (7.1%)	103	webcastletech: 18 non-HTTPS — same problem
https://www.webdesigncochin.in/mobile-application-development/	63 (6.8%)	89	webcastletech: no mobile-dev page links visible
https://www.webdesigncochin.in/digital-marketing-company-kochi-kerala/	56 (6%)	562	webcastletech: no comparable page links

Service Page Link Gap — Critical Opportunity

- The competitor has 83 referring domains to its SEO service page — webcastletech.com has only 17.
- The competitor has dedicated link-building for mobile application development and digital marketing service pages.
- webcastletech.com's service page link distribution is extremely shallow — nearly all authority sits at the homepage.
- This is why the competitor may rank above webcastletech.com for specific service keywords despite a lower AS.
- Building 50+ referring domains to each key service page within 6 months would close this gap.

7.8 Link Growth Trend

Trend	webdesigncochin.in	webcastletech.com	Verdict
Referring Domain Growth (1Y)	545 → 997 (+83%)	670 → 558 (-17%)	COMPETITOR WINNING
Backlink Growth (1Y)	23.7K → 29K (+22%)	307K → 750K (+144%)	webcastletech (volume only)
Current Link Acquisition	Active (Apr 2026 surge)	Stopped (Jan 2026)	COMPETITOR WINNING
New Domains/Month	~40–90 new domains/mo	~-5 to +3 net/mo	COMPETITOR WINNING

URGENT — Competitor Growth Warning

- The competitor grew referring domains by 83% in one year (545 → 997) while webcastletech.com DECLINED 17% (670 → 558).
- April 2026 shows a major surge in competitor new referring domains — an active campaign is underway RIGHT NOW.
- The competitor recently surpassed 1,000 referring domains — a psychological and algorithmic milestone.
- At current trajectories, the competitor will surpass webcastletech.com's authority score within 2–3 months.
- The competitor's backlink count also spiked in April 2026 to near 29K — indicating a fresh outreach push.
- This is the single most urgent finding in this entire audit — immediate, sustained action is required.

Competitor Backlink Gap Analysis

Identifies backlink gaps between your site and competitors, highlighting high-value acquisition opportunities to close the authority gap.

8.1 Best Backlink Opportunities

These high-authority domains currently link to webdesigncochin.in (competitor) but NOT to webcastletech.com. Securing even a few of these would significantly boost the authority score.

Domain	A S	Monthly Visits	Category	Acquisition Strategy
google.co.in	91	109M	Education	Optimise Google Business Profile fully — this is the source
habr.com	72	36.3M	Online Services	Create company profile or publish tech article on this developer community
marinetraffic.com	70	28.5M	Maritime	Business directory listing on this platform
steemit.com	69	3.5M	Online Services	Create account; publish web design/SEO blog posts with backlink
godaddysites.com	68	3.1M	Hospitality	GoDaddy-hosted website or profile linking to webcastletech.com
googleblog.com	68	4.3M	Software & Dev	Create Blogger.com post or profile linking to site
gropedia.com	65	7.9M	Wiki platform	Submit a company or topic page to this wiki-style platform
home.blog	63	6.1M	Online Services	Create WordPress.com blog with industry content + backlink
rb.gy	55	3.6M	Advertising & Marketing	Identify content-sharing channel; participate with webcastletech.com links
coda.io	53	3.1M	Online Services	Create public resource page or company profile on Coda

Priority Actions for Best Opportunities

- google.co.in (AS 91) — Ensure Google Business Profile is fully verified, optimized with all services, photos, and linked website. This is the easiest high-authority link available.
- habr.com (AS 72) — Register a company account and publish a technical article about web development or digital marketing trends in Kerala. Low effort, very high authority.
- steemit.com (AS 69) — Create an account and publish 3–5 original blog posts about web design, SEO, or digital marketing tips. Include a natural link back to webcastletech.com.
- googleblog.com (AS 68) — Set up a Blogger.com blog under the webcastletech brand and publish regular content. Easy, free, and delivers a link from Google's own domain.
- coda.io (AS 53) — Build a public Coda document (e.g., a resource list, web design guide, or digital marketing checklist) that links back to the main site.

8.2 Weak Backlink Opportunities

These domains currently link to BOTH webcastletch.com and the competitor — but the competitor has significantly more backlinks from these sources. Expanding presence here can close the gap.

Domain	AS	Monthly Visits	Category	webcastletch.com	Competitor	Action
siteprice.org	34	275K	Online Services	>1	>1	Expand listing detail
ablogic.com	29	145K	Information Technology	>1	>3	Add more category pages
bye.fyi	25	24.8K	Automotive	>1	>1	Maintain presence
getlisteduse.com	23	424K	Online Services	>1	>8	Fully complete profile
wtoregister.com	18	87.9K	Advertising & Marketing	>1	>2	Add service descriptions
mycityguides.in	13	41.9K	Online Services (India)	>1	>1	Add location pages
dltech.forum	10	3.3K	Technology Forum	>1	>5	Post more forum replies
bizldex.com	6	520K	Information Technology	>1	>6	List all services
ekcochat.com	6	443K	Social/Chat	>1	>19	Investigate link pattern
prbookmarkingwebsites.com	6	112K	Consulting	>1	>1	Submit PR content

Recommendations

- getlisteduse.com has 8x more competitor links — fully complete the business profile with all service categories, descriptions, and keywords.
- ekcochat.com shows >19 competitor links vs >1 — investigate what content type the competitor is using and replicate.
- bizldex.com (520K monthly visits despite AS-6) has high traffic value — list all services and locations to match competitor's 6+ entries.
- mycityguides.in is India-specific — add all Kerala/Kochi service location pages to improve local visibility.
- dltech.forum — participate actively in web design, digital marketing, and IT forums with helpful replies and natural profile links.

Brand & Digital Presence

Assesses the website's visibility across the web through brand mentions, digital PR coverage, and social platform engagement.

9.1 Brand Mentions Summary

Platform	Found	Profile URL	Count	Last Activity	Quality
Facebook	Yes	facebook.com/webcastlemedia	5K Followers	13 April 2026	Optimized
Instagram	Yes	instagram.com/webcastlettech/	2K Followers	13 April 2026	Optimized
LinkedIn	Yes	linkedin.com/company/webcastle/	23K Followers	23 April 2026	Optimized
X (Twitter)	Yes	x.com/webcastlettech	231 Followers	Oct 2024	Weak Activity
YouTube	Yes	youtube.com/@WebcastleMedia	265 Subscribers	Jan 29, 2026	Optimized
Google Business	Yes	share.google/KWByDEJmYczyk7EN2	4.5/5 Rating (287 reviews)	N/A	Optimized
Quora	Yes	quora.com/topic/WebCastle-Media-Pvt-LTD	Medium Mentions	N/A	Weak

Key Findings

- The brand has a strong and well-established presence across all major digital platforms, indicating good overall brand visibility.
- LinkedIn is the standout channel with 23K followers and recent activity (April 2026) — this is strong B2B authority.
- Facebook (5K followers) and Instagram (2K followers) both show active, optimized profiles with recent content.
- Google Business Profile is excellent — 4.5/5 rating from 287 reviews is a strong local SEO trust signal.
- X (Twitter) is the weakest channel: only 231 followers and inactive since October 2024 — 6 months with no posts.
- YouTube has 265 subscribers — low relative to the brand's age and LinkedIn presence.
- Quora presence is passive (topic page only) — no active community engagement observed.

Recommendations

- Strengthen X (Twitter): post at least 3x per week sharing industry insights, case studies, and company news to revive this channel.
- Increase YouTube output: publish bi-weekly content (client case studies, web design tutorials, SEO tips for Indian businesses).
- Continue the strong LinkedIn strategy — it is the best B2B credibility builder currently in use.

- Encourage more Google Business reviews after project completions — maintain momentum on the 287 existing reviews.
- Improve Quora engagement by answering industry questions about web design, SEO, and digital marketing in India — builds topical authority and generates Nofollow links.
- Align branding across all platforms — ensure consistent logo, bio, and messaging for a unified digital identity.

Local SEO & Citations

Evaluates local search visibility through citation consistency, business directory presence, and review platform performance across Indian markets.

10. Local SEO & Citations

10.1 Citation Consistency (NAP Audit)

Directory Platform	Listed	Profile URL	Status
JustDial	No	N/A	Missing — critical gap
Sulekha	No	N/A	Missing — critical gap
IndiaMart	Yes	indiamart.com/webcastlemediakochi/aboutus.html	Active
Yelp	No	N/A	Missing
Bing Places	No	N/A	Missing — needs setup

Key Findings

- JustDial is missing — this is the most-visited local business directory in India and a critical gap.
- Sulekha is missing — another major Indian B2B/services platform not being used.
- Yelp and Bing Places are missing, limiting visibility in non-Google search ecosystems.
- IndiaMart listing is active — good for B2B visibility.
- Brand name inconsistency: 'WebCastle Media' is used in some directories vs the correct 'WebCastle Technologies'.
- NAP inconsistency dilutes citation authority and confuses search engine entity disambiguation.

Recommendations

- Claim and create a JustDial listing immediately — it is the most important missing citation for any India-based business.
- Register on Sulekha and complete the service provider profile with all relevant categories.
- Set up Bing Places — this enables visibility in Microsoft Bing search and Microsoft Maps.
- Standardize the brand name across ALL directories: use 'WebCastle Technologies' consistently, not 'WebCastle Media'.
- Ensure identical NAP (Name, Address, Phone) across every directory — any variation reduces citation trust signals.

10.2 Local Directory Listings Audit

Directory Platform	Listed	Profile URL	Status
JustDial	No	N/A	Missing
Sulekha	No	N/A	Missing
IndiaMart	Yes	indiamart.com/webcastlemediakochi/	Active
Yelp	No	N/A	N/A
Bing Places	Yes	bing.com/maps/search?q=webcastle+kochi	Active

Recommendations

- Expand directory presence by listing on JustDial, Sulekha, and Yelp as immediate priorities.
- Optimize existing IndiaMart and Bing Places listings with complete business details, keywords, and updated descriptions.
- Prioritize niche-relevant IT and web development directories for stronger topical relevance signals.
- Target 20+ high-quality Indian business directories within the next 3 months.

10.3 Review Platform Presence & Ratings

Platform	Reviews Count	Rating	Last Review	Sentiment
Google Business Profile	287	4.5 / 5	March 2026	Mixed — generally positive
Facebook Reviews	15	94% recommended	19 April 2018	Positive (outdated)
Trustpilot	1	3.7 / 5	Nov 22, 2021	Minimal
JustDial	N/A	N/A	N/A	Not listed
Sulekha	N/A	N/A	N/A	Not listed

Key Findings

- Google Business Profile is the primary strength: 287 reviews and 4.5 rating is excellent and contributes strongly to local SEO.
- Facebook reviews are outdated — the last review was in April 2018 (8 years ago), despite the profile being active.
- Trustpilot has only 1 review — essentially no third-party review presence, which limits trust signals.
- Overall sentiment is mixed but positive, with Google being the primary trust driver.

- The absence of recent Facebook reviews despite 5K followers indicates no review generation strategy is in place.

Recommendations

- Implement a post-project review request system: automatically email clients after project completion asking for a Google review.
- Run a Facebook review revitalisation campaign — reach out to the 5K followers with a gentle review request.
- Invite all recent clients to Trustpilot to build third-party review presence.
- Respond to all existing reviews (positive and negative) to demonstrate active reputation management.
- Set a quarterly review target: aim for 10+ new Google reviews per quarter to maintain freshness and ranking signals.

Findings, Strategy & Roadmap

Key findings, strategic recommendations, priority action plan, roadmap, and expected impact.

11. Key Findings Summary

Strengths

#	Strength	Detail
1	Higher Authority Score	AS 29 vs competitor's AS 25 — webcastletech.com currently leads on domain authority.
2	Low Toxicity Score	Only 0.6% toxic backlinks vs competitor's 7.4% High toxicity — much safer profile.
3	Strong Google Business Presence	287 reviews, 4.5/5 rating — excellent local SEO trust signal and social proof.
4	Strong LinkedIn Presence	23K followers with recent activity — best-in-class B2B credibility for the market.
5	Reputable Network Graph	SEMrush classifies the domain as 'Reputable' — positive neighbourhood signal.
6	Established Domain Age	Founded 2008 — 18+ years of domain age confers trust signals with search engines.

Weaknesses

#	Weakness	Detail
1	50.6% Money Anchor Concentration	5–10x higher than safe threshold — highest single penalty risk in the profile.
2	99% Follow / <1% Nofollow	Almost no Nofollow links — artificially skewed profile that looks manipulative.
3	Link Concentration in 2 Domains	webcastle.in and casadel.com account for the vast majority of all backlinks.
4	Declining Referring Domains	Down from 670 (Oct 2025) to 558 (Apr 2026) — losing domain diversity.
5	No Link Building Since Jan 2026	Campaign stopped 3+ months ago while competitor is actively building.
6	Weak Service Page Links	SEO service page has only 17 referring domains vs competitor's 83.
7	Missing Major Indian Directories	No JustDial, Sulekha, or Yelp presence — critical local citation gaps.

Opportunities

#	Opportunity	Detail
1	High-Authority Gap Domains	google.co.in (AS 91), habr.com (AS 72), steemit.com (AS 69) link to competitor — easy wins available.
2	Competitor Toxicity Risk	Competitor's HIGH toxicity may result in a penalty — be ready to capture rankings.
3	India/Kerala Local Links	Competitor has 5x more .in domain links — target Indian news, chambers of commerce, and business directories.
4	Service Page Deep Linking	Building 50+ domains to each service page would close the gap and drive commercial rankings.
5	Twitter/YouTube Revival	Inactive since 6+ months — reactivating these channels builds Nofollow diversity.
6	Disavow Competitor Monitoring	741 lost competitor backlinks represent opportunities — identify the linking content and replicate.

12. Strategic Recommendations

Based on the audit findings, the following strategic recommendations are prioritised by potential SEO impact.

#	Recommendation	Impact
1	Disavow all confirmed toxic links (58) via Google Search Console immediately.	High
2	Submit a Google Disavow file and review 1,423 potentially toxic backlinks.	High
3	Rebalance anchor profile: reduce money anchors from 50.6% to under 10% through branded link building.	High
4	Implement 301 redirects from http:// and http://www. versions to canonical HTTPS URL.	High
5	Launch a sustained link-building campaign: 10–15 new quality referring domains per month.	High
6	Acquire links from competitor gap domains: google.co.in, habr.com, steemit.com, coda.io.	High
7	Build 50+ referring domains to each key service page (SEO, web design, digital marketing) within 6 months.	High
8	Create and claim missing local directory listings: JustDial, Sulekha, Bing Places, Yelp.	Medium
9	Standardize NAP across all directories — use 'WebCastle Technologies' consistently.	Medium
10	Increase .in domain backlinks from Indian news sites, chambers of commerce, and business platforms.	Medium
11	Build Nofollow links through Quora participation, Reddit, LinkedIn articles, and forum engagement.	Medium
12	Reactivate X (Twitter) with 3x/week posting and YouTube with bi-weekly video content.	Medium
13	Implement a post-project review request system to generate consistent Google reviews.	Medium
14	Monitor competitor for Google penalty and position to capture rankings if it occurs.	Low
15	Pursue guest posting on Kerala/India tech and business media for editorial .in links.	Low

13. Priority Action Plan

Priority	Action	Timeline	Owner
High	Submit Google Disavow file for 58 toxic backlinks	Week 1	SEO Specialist
High	Audit and disavow 1,423 potentially toxic links	Week 1–2	SEO Specialist
High	Implement 301 redirects (http → https canonical)	Week 1	Developer
High	Set up JustDial, Sulekha, Bing Places, Yelp listings	Week 2	SEO Specialist
High	Standardize NAP across all existing directories	Week 2	SEO Specialist
High	Create Google Business, Blogger.com, steemit.com profiles for backlinks	Week 2–3	SEO Specialist
High	Begin habr.com article creation for AS-72 backlink	Week 3–4	Content + SEO
Medium	Launch guest post outreach (4 posts/month target)	Month 1–2	Content + SEO
Medium	Competitor link gap outreach (10 domains/month)	Month 1–3	SEO Specialist
Medium	Build links to SEO and web design service pages	Month 1–4	SEO Specialist
Medium	Increase India/.in domain backlink outreach	Month 2–4	SEO Specialist
Medium	Reactivate X (Twitter) with 3x/week content posting	Month 1	Social Media
Medium	Launch YouTube content: 2 videos/month	Month 2	Content Team
Medium	Implement post-project Google review request system	Month 1	Account Managers
Low	Build Quora and forum Nofollow link presence	Month 2–4	SEO Specialist
Low	Digital PR and press release outreach (legitimate)	Month 3–5	PR + SEO
Low	Pursue .edu/.org resource page links	Month 4–6	SEO Specialist

14. Off-Page SEO Roadmap (3–6 Months)

Month	Focus Area	Key Actions	Success Metrics
Month 1	Audit & Clean-Up	Disavow toxic links, fix redirects, claim directory listings, standardize NAP	Disavow submitted, 5 new directory listings, all redirects live
Month 2	Foundation Building	Guest posts x4, habr.com article, Google/Blogger profiles, review system live	10+ new quality referring domains, 20 new Google reviews
Month 3	Gap Closing	Competitor link gap outreach (10+ domains), service page link building begins	25+ new referring domains total, 5+ service page backlinks
Month 4	Authority Growth	Digital PR campaign, local India media outreach, YouTube content launching	5+ editorial links, 3+ .in domain links, YouTube 2 videos
Month 5	Scale & Diversify	Increase link velocity, resource page links, Quora/forum Nofollow links	15+ new domains/month, 10%+ reduction in money anchor %
Month 6	Review & Optimise	Full audit of progress, strategy refinement, roadmap update for next 6 months	AS 32+, 700+ referring domains, money anchor <30%

15. Expected SEO Impact

Metric	Current State	6-Month Target	Confidence
Domain Authority Score	29	32–35	High
Referring Domains	558 (declining)	700+ (growing)	High
Organic Traffic	5.8K/month	+20–30% increase	Medium
Money Anchor Concentration	50.6%	Below 30%	High
Toxic Link Risk	Low (0.6%)	Maintained Low	High
Nofollow Link %	<1%	8–12%	High
Service Page Referring Domains	12–17 per page	50+ per key page	Medium
Google Review Velocity	Sporadic	10+ per quarter	High
India (.in) Referring Domains	42 (7%)	80+ (12%+)	Medium
JustDial/Sulekha Presence	Missing	Active, optimised	High
Competitor Authority Gap	webcastletech +4 AS	webcastletech +8 AS	Medium

16. Conclusion

WebCastle Technologies' off-page SEO profile presents a mixed picture with clear and significant strengths to build on alongside concrete, urgent risks that require immediate action.

The most critical finding is the competitive threat from webdesigncochin.in, which has grown its referring domain count by 83% in one year while webcastletech.com has declined by 17%. This trajectory, combined with the competitor's active April 2026 link-building surge, means that without immediate strategic intervention, the authority gap could reverse within 2–3 months.

However, webcastletech.com holds meaningful advantages: a higher current authority score (29 vs 25), significantly lower toxicity (0.6% vs 7.4%), a well-established brand with strong LinkedIn and Google Business presence, and an 18-year domain history. These are assets that — combined with the strategic actions outlined in this report — provide a strong foundation for sustained improvement.

The highest-priority actions are: immediate toxic link disavowal, fixing canonical URL redirects, rebalancing the dangerously over-concentrated money anchor profile, claiming critical missing local directory listings, and resuming a consistent and quality-focused link acquisition strategy.

By executing the recommended 6-month roadmap, measurable improvements in domain authority, search visibility, local citation coverage, and organic traffic are achievable. The target of reaching an Authority Score of 32–35 and 700+ referring domains within 6 months is realistic if the action plan is followed consistently.

Key Takeaways

- Domain authority is competitive (AS 29) but at risk of being overtaken by the competitor's rapid growth.
- Link profile diversity needs significant improvement — concentration in 2 domains and 50.6% money anchors are the two biggest risks.
- Toxic link risk is currently LOW — this advantage must be actively maintained.
- 10 high-authority competitor gap domains (AS 53–91) represent immediately actionable, low-effort link opportunities.
- The 6-month action plan is projected to raise AS to 32–35 and restore referring domain growth within 6 months.

Glossary of SEO Terms

301 Redirect

A permanent redirect from one URL to another. Passes the majority of link equity from the old URL to the new one.

302 Redirect

A temporary redirect. Does not pass full link equity and should not be used as a permanent solution.

404 Error

A server response indicating that a page could not be found. Inbound links pointing to 404 pages represent lost link equity.

Anchor Text

The clickable, visible text of a hyperlink. A natural mix of branded, partial-match, and generic anchors is preferred by search engines.

Authority Score (AS)

A composite SEMrush metric that evaluates a domain's overall SEO strength based on backlink quality, organic traffic, and spam signals. Scored 0–100.

Backlink

An inbound link from an external website pointing to your site. Backlinks are a primary off-page ranking signal, acting as votes of authority and trust.

Backlink Gap

Domains that link to competitors but not to your site. Gap analysis reveals high-priority backlink acquisition targets.

Brand Mention

Any online reference to a brand name — either as a linked or unlinked mention. Unlinked mentions represent outreach opportunities to convert into backlinks.

Citation (NAP)

A reference to a business's Name, Address, and Phone number across online directories. Consistent NAP citations strengthen local SEO trust signals.

Compound Anchor	An anchor text that combines a brand name with a keyword, e.g. 'WebCastle Technologies SEO services'.
Disavow	The process of asking Google to ignore certain inbound links, used when toxic or spammy backlinks risk triggering a manual or algorithmic penalty.
Domain Authority (DA)	A Moz metric scored 1–100 that predicts a website's likelihood of ranking in search results, based on the quality and quantity of inbound links.
DoFollow Link	A hyperlink that passes link equity from the linking page to the destination. DoFollow links directly influence search engine rankings.
Empty Anchor	A backlink where the clickable text contains no visible text — typically image links or links where the anchor tag has no text content.
Follow Link	See DoFollow Link.
Link Equity	The SEO value (also called 'link juice') passed from one page to another through a hyperlink.
Link Velocity	The rate at which a website gains or loses backlinks over time. Sudden spikes may trigger algorithmic scrutiny; steady growth is preferred.
Money Anchor	An exact-match keyword anchor text that directly targets a commercial search term, e.g. 'SEO company in Kochi'. Over-use triggers Penguin penalties.
Naked URL Anchor	An anchor text that uses the raw URL as the clickable text, e.g. 'https://webcastletech.com'. Considered natural and safe.
NoFollow Link	A hyperlink with rel='nofollow', instructing search engines not to pass link equity. Used for paid links or untrusted user-generated content.
Organic Anchor	A naturally occurring anchor text that describes the linked content without targeting specific keywords.
PageRank	Google's original algorithm for measuring page importance based on the quantity and quality of links pointing to a page.
PBN (Private Blog Network)	A network of sites created solely to build backlinks to a target site. PBN links are manipulative and violate Google's Webmaster Guidelines.

Referring Domain	A unique external domain containing at least one backlink to your site. Multiple links from the same domain count as one referring domain.
Spam Score	A metric showing the percentage of similar sites that have been penalised. High spam scores from linking domains signal potential ranking risk.
TLD (Top-Level Domain)	The suffix of a domain name, e.g. .com, .in, .org, .edu. The distribution of TLDs in a backlink profile indicates geographic and topical coverage.
Toxic Link	A backlink from a low-quality, spammy, or irrelevant source that may suppress a website's search rankings. Toxic links should be disavowed.
Trust Flow	A Majestic metric scored 0–100 measuring the trustworthiness of links. Sites linked by authoritative pages score higher.
UGC Link	A hyperlink with rel='ugc', indicating user-generated content such as forum posts or comments. Does not pass link equity directly.

Thank You

We look forward to helping you achieve your SEO goals
